WATER RESTRICTIONS????

As we all know we have had a really wet winter. Our well here in Leavitt Lake has maintained its static level. (The level of the water when the pump is not running).

However, the state says that water conservation needs to become a way of life. And since there are still regions in California that are still experiencing the drought, we must continue to follow their regulations

which have been reduced.

So we must abide by what the state says. There will still be no water on hard surfaces (the driveways, sidewalks, gutters or in the road) You still cannot water for 48 hours after a substantial rain, and you cannot water in the heat of the day or waste water.

Leavitt Lake will NOT have certain watering days, but will enforce "the no wasting water poli-

cies" unless the usage gets to be too high, then we may have to revert to certain watering days. If everyone will just use common sense, we shouldn't have a problem.

Please remember that you do not need to water your lawns for hours in the same place.

We have been receiving noise complaints. Complaints about loud music and barking dogs.

If you have music going, make sure that it isn't so loud that it disturbs your neighbors. And if you have dogs that bark, please either bring them inside or see why they are barking and quiet them down.

Be Nice To Your
Neighbors

SPRING CLEANING

Spring is finally here! It is time to start cleaning up around our homes. If you have any debris piled in your front yards,

but don't want to haul it off, then you must store it in your back yards where neighbors cannot see it.

With all the

rain/snow we have had we will also have lots of weed growth. Please keep the weeds down to lower the potential for fire later on.
