May 2017

District Appearance –Shameful!!

I simply cannot believe the way our community is looking! On almost every street there are homes that are overgrown with weeds and many that have weeds growing around broken down vehicles parked on the “lawns”.

Several homes have junk, trash and miscellaneous debris piled all around.

Our community is a fire hazard if there ever was one. Firefighters are not required to even try and save your home if there is debris piled and it is unsafe for them to enter

the property. They would do whatever they could to save the surrounding structures only.

It is imperative that the homes have a defensible space around them. If your home is one that is overgrown or has debris everywhere you must clean them up immediately!

If you have an area outside of your fence-mow down this area too.

Let’s make our community a safe place to live.

Fire could start in seconds and overcome our community in a very short period of time.

Watering For 2017

The state still has some restrictions in place:

1. You cannot have water on any hard surface. That means the side-

walks, driveways or the gutters

2. You cannot water for 48 hours after a substantial rain

While Leavitt Lake is not imposing any other restrictions, you still *cannot* waste water. You can’t

leave water running in the same place for extended periods of time, nor can you allow water to run in the gutter.
